# OPEN HOUSE

Wednesday, September 24, 2014 • 7:30 a.m. – 9:30 a.m.

- Learn more about the Carlsbad Desalination Project
- Review construction details that may impact your business

## CREWS TO BEGIN WORK At Faraday Avenue and El Camino Real in October

Construction crews are making significant progress on the 10-mile Carlsbad Desalination Project pipeline in the Carlsbad Research Center. Crews are moving east along the route on Faraday Avenue and pipeline installation is scheduled to reach El Camino Real in October.

In order to maintain access and traffic flow throughout construction, crews will be tunneling under the intersection of El Camino Real and Faraday Avenue. Traffic on Faraday Avenue will be reduced to one lane in each direction on the north side of the street. During that time, the left-turn lanes onto Faraday from El Camino Real in both directions will be reduced to one lane. To avoid potential traffic impacts, drivers from northbound El Camino Real are encouraged to reach westbound Faraday Avenue via Salk Avenue and eastbound Faraday Avenue via Orion. Drivers traveling southbound on El Camino Real should access westbound Faraday Avenue via College Boulevard or Salk Avenue and eastbound Faraday Avenue via u-turn at the El Camino Real/Cougar Drive intersection. Construction will begin in early October and continue through December.

Every effort will be taken to minimize impacts to surrounding communities during construction. Vehicle traffic and access to nearby businesses is being maintained throughout pipeline installation.

→ **Learn more about the Carlsbad Desalination Project and review construction details that may impact you and your business.**

In preparation for construction reaching El Camino Real, nearby businesses are invited to attend an Open House. During the event, attendees will have the opportunity to speak with the Carlsbad Desalination Project team to learn more about the Project and review details of construction activity that may impact their business or commute.
